SOFTWARE DEVELOPMENT PROJECT

MyFLix App

- Applied the industry-standard MERN Stack.
- Developed backend logic using MongoDB and Express.
- Conducted comprehensive study and development of frontend using various frameworks such as ReactJS and Angular.
- Implemented web app hosting and optimized security.

ChatMe App

- Designed a user-friendly interface that users can easily personalize for better accessibility.
- Created a real-time chat feature using WebSockets, making messages instant and allowing for offline use.
- Added cool features like the ability to share photos and use the camera within the app, making it more engaging for users.

EMPLOYMENT HISTORY

LOGISTIC COORDINATOR Kramer | 2023- ongoing

- Ensured optimal product quantity and quality for the assembly line, consistently meeting delivery schedules and organizing efficient inbound storage.
- Leveraged software management proficiency in SAP and Excel to monitor and optimize the supply chain route, demonstrating a keen eye for detail.
- Spearheaded a timely and precise refurbishment of the assembly line, showcasing a commitment to punctuality and precision.

STORAGE MANAGER Villeroy & Boch | 2022-2023

- Spearheaded product quality assurance, streamlined warehouse logistics, and orchestrated efficient product preparations for expedition.
- Verified product completeness and integrity within constrained space and delivery timelines, utilizing planimetrica for warehouse organization. Expertly collected, labeled, and palletized batches for delivery.
- Executed tasks autonomously within tight schedules, showcasing adept space and time management for orderly storage and expedition schedules

DISPATCHER

Hks / Ups | 2019-2020

- Directed daily route planning for a 5-member team, optimizing efficiency and swiftly troubleshooting expedition-related errors.
- Tailored route assignments based on driver knowledge and language proficiency, boosting overall delivery performance.
- Instructed personnel on software usage and delivery processes, enhancing team competence and operational seamlessness.
- Mediated between customers and drivers, expertly resolving delivery discrepancies and elevating customer satisfaction.
- Spearheaded onboarding for 8 drivers, streamlining operations and delivering top-tier customer service.
